

LENTEK L-250 Cut5 Cut-Resistant Gloves

The perfect glove for cut-risk environments

LENTEK™
Personal Protective Equipment

Liner material is High-Performance Polyethylene (HPPE) reinforced with glass fiber...for outstanding cut-resistance

Consistently tight no-gap weave for greater protection

Here's an industrial glove that protects your workers' hands in cut-risk environments. The L-250 Cut5 Cut-Resistant Gloves from LENTEK act like a tough "extra skin" yet still provide the flexibility and comfort skilled workers need. Check out these impressive features and benefits:

- Liner material is High-Performance Polyethylene (HPPE) reinforced with glass fiber and consistently tight no-gap weave...for outstanding cut-resistance
- Meets U.S. standard ANSI Level 4 and European standard CE Level 5 for cut-resistance
- Non-slip properties for sure grip, coupled with flexibility for detail work
- Ergonomic, seamless, form-fitting liner minimizes hand fatigue and provides excellent comfort for continuous, all-day wear
- Latex-free, greatly reducing allergy risk
- Silicone-free

Ideal for a variety of cut-danger environments...
