

LENTEK L-200 Nitrile Foam-Coated Gloves

The perfect blend of safety, comfort and quality.

Provides layer of protection from abrasions and punctures while maintaining sensitive feel for the wearer

Consistent dispersion of micro-pores in the nitrile foam allows the glove to "breathe," wicking away perspiration

Now there's an industrial glove that protects your workers' hands without sacrificing feel, flexibility and comfort. L-200 Nitrile Foam-Coated Gloves from LENTEK carry a host of impressive features and benefits:

- Nitrile foam coating protects hands from grease, oils, hydrocarbons and abrasion
- Ample coating with consistent thickness for extra protection from cuts and punctures while maintaining sensitive feel for the wearer
- Consistent dispersion of micro-pores in the nitrile foam allows the glove to "breathe," wicking away perspiration
- Non-slip properties for sure grip, coupled with flexibility for detail work
- Ergonomic, seamless, form-fitting liner minimizes hand fatigue and provides excellent comfort for continuous, all-day wear
- Consistent, high quality weave for unmatched performance, comfort and long-lasting service
- Latex-free, greatly reducing allergy risk
- Silicone-free
